

**MATHEMATICAL MODELS
IN GEOPHYSICS**

SYMPOSIUM

**MODELES MATHEMATIQUES
EN GEOPHYSIQUE**

IAHS—AISH Publication No. 116

Proceedings of the Moscow Symposium, August 1971
Actes du Colloque de Moscou, août 1971

Published by the International Association of Hydrological Sciences 1976
Typeset and Printed by The Whitefriars Press Ltd., London and Tonbridge, UK

The selection and presentation of material and opinions expressed in this publication are the responsibility of the authors concerned and do not necessarily reflect the views of the publishers

Table of contents

Table des matières

Preface	v
Préface	vii
Authors' addresses—adresses des auteurs	xi
1 Modelling based on dynamic equations	
Mise en modèle basée sur les équations dynamiques	
Comparison of hydrodynamic models of the atmosphere and the hydrosphere <i>G. P. Kalinin, V. P. Sadokov and L. S. Kuchment</i>	3
Cumulative results of testing a meteorological mathematical model: the description of the model (abstract only) <i>K. Miyakoda</i>	9
Three-dimensional numerical experiments with convection (abstract only) <i>U. Shafrir and B. Shkoller</i>	10
Numerical methods and results of calculations of flows in the baroclinic ocean <i>G. I. Marchuk, A. S. Sarkisyan and V. P. Kochergin</i>	11
Numerical simulation of storm surges induced by typhoons <i>M. Miyazaki</i>	18
The development of mathematical models for tides and storm surges in shallow seas <i>R. A. Flather</i>	23
Physical evaluation of basin modelling by hydrodynamic equations of motion <i>Ven Te Chow</i>	49
Application of analog and mathematical simulation in hydrogeological investigations in the USSR <i>G. V. Bogomolov, V. M. Shestakov, D. I. Peresunjko, I. K. Gavich and V. A. Mironenko</i>	57
2 Stochastic models	
Modèles stochastiques	
Stochastic prediction of deterministic models <i>E. S. Epstein</i>	67
Sources of stochasticity in geophysical processes <i>Vujica Yevjevich</i>	83
Statistical models in geophysics <i>E. G. Blokhinov, G. M. Der-Megreditchian, Yu. K. Kalinin, S. N. Kritsky, V. N. Lugovenko, M. F. Menkel, D. Ya. Ratkovich, A. Sh. Reznikovskiy, J. S. Vsekhsviatskaya, M. I. Yudin and L. A. Yudovitch</i>	101
Bases physiques des modèles stochastiques en géophysique <i>J. Bernier</i>	110
3 Observation networks	
Reseaux d'observation	
Models and data <i>N. C. Matalas and W. B. Langbein</i>	121
The dynamical adaptation of meteorological fields <i>J. Kluge and K. H. Stahnke-Jungheim</i>	127
Quasi-geostrophic eddies and the general ocean circulation: the Pre-MODE experiment (abstract only) <i>A. R. Robinson</i>	132
4 Contributed papers	
Communications contribuées	
Simulation of nonlinear flow systems by combining linear models <i>A. Becker</i>	135

Contents

Mathematical models in well hydraulics	<i>P. Mauersberger</i>	143
Modèles mathématiques pour la résolution de différents problèmes de l'hydrologie de surface	<i>Ts. E. Mirtskhoulava</i>	152
Principles of mechanics and their application to river formation	<i>G. Peschke</i>	159
Models for the turbulence structure over smooth and rough surfaces	<i>R. Roth</i>	165
Using optimization and kinematic wave theory to obtain resistance to laminar overland flow	<i>David L. Schreiber and Donald L. Bender</i>	171
Numerical models of thermal convection in the laboratory and in the atmosphere (abstract and references only)	<i>Richard C. J. Somerville</i>	180
Mathematical models of the geophysical vortices	<i>H. S. Takhar</i>	181
Dynamic models of the formation of organized cloud systems	<i>Wen Tang</i>	201
Diurnal variation of wind and temperature fields in the Ekman layer (abstract only)	<i>G. Yamamoto, A. Shimanuki, M. Aida and N. Yasuda</i>	214
<i>Recent titles in the series of IAHS Proceedings Publications</i>		215
