Summary of the activity of the Panta Rhei Working Groups – Year 2014

Title of the Working Group: Thirsty Future – Energy and food impacts on water

Report of the activity of the working group in 2014

During 2014 the Group has been mainly focusing on structuring ideas for the development of the topic. The most important contributions include the presentation at the 2014 AGU Fall Meeting on water-energy links in London and the accepted session for the 2015 EGU General Assembly on the Irrigation, Water and Society. In addition, one PhD student has started his research on the group-related topic. Future plans include more intensive collaboration involving joint journal publications and educational materials for students.

Description of the opportunities provided by Panta Rhei

We are very pleased with the support by the Panta Rhei programme, in particular in giving the additional visibility and advertising the forthcoming EGU session on the website.

Suggestions for the future development of Panta Rhei

A newsletter summarising the activities of the programme and specific working groups would be useful to have an overview of the work done by other team members.
