**Summary of the activity of the Panta Rhei Working Groups – Year 2014**

**Title of the Working Group:** \_\_ Changing Biogeochemistry of Aquatic Systems in the Anthropocene\_\_

**Report of the activity of the working group in 2014**

1. In 2014, we have organized a special session under this working group at 2014 AGU fall meeting, B34D: Variations in Aquatic Biogeochemical, Hydrological, and Ecosystem Functional Responses to Anthropogenic Changes. The co-conveners from our WG are Hong-Yi Li and Nandita Basu. The invited speakers from our WG are Gia Destouni, Jeffrey Richey, Matthew Hipsey and Tim Covino.
2. Hong-Yi Li and Fan Zhang have submitted a proposal to Chinese Academy of Science (CAS) requesting some funding to support an international workshop for our WG. But did not get funded. We will continue to try other funding opportunities next year.
3. Hong-Yi Li, Tim Covino and Siva Sivapalan are initializing a special journal issue devoted to the research theme of our WG. We will submit the proposal in the next month or so.

**Description of the opportunities provided by Panta Rhei**

Panta Rhei provides a great opportunity for the scholars and researchers from worldwide to communicate through an unified platform. For example, a few researchers found our WG attractive after reading the proposal posted on the Panta Rhei website and requested to join us.

**Suggestions for the future development of Panta Rhei**

It would be great if Panta Rhei could provide some help to the WG chairs on getting small funding support to facilitate small international workshops etc.
