Series Editor's Foreword	by Jeffrey J. McDonnell	v
Introduction		1
Evaporation Measurement		
A Mass Budget Methods – Commentary		5
A1	Catchment water balance	
	Bates, C. G. (1921) First results in the streamflow experiment Wagon Wheel Gap, Colorado. <i>J. Forestry</i> 19, 402-408.	9
A2	Lysimetric measurements	
	Pruitt, W. O. & Angus, D. E. (1960) Large weighing lysimeter for measuring evapotranspiration. <i>Trans. ASAE</i> 3, 13–18.	16
A3	Soil moisture depletion measurements	
	Geisel, W., Lorsch, S., Renger, M. & Strebel, O. (1970) Water flow calculations by means of gamma absorption and tensiometer field measurements in the unsaturated soil profile. In: <i>Isotope Hydrology 1970</i> , 663–672. IAEA, Vienna, Austria.	20
A4	Throughfall measurements	
	Lloyd C. R. & Marques, A. O. (1988) Spatial variability of throughfall and stemflow measurements in Amazonian rain forest. <i>Agric. Forest Met.</i> 42, 63–73.	30
B Water Transfer Measurements – Commentary		41
B1	Porometry	
	van Bavel, C. H. M., Nakayama, F. S. & Ehrlert, W. L. (1965) Measuring transpiration resistance of leaves. <i>Plant Physiol., Lancaster</i> 40, 535–540.	47
B2	Sap flow measurements	
	Granier, A. (1985) Une nouvelle méthode pour la mesure du flux de sève brute dans le tronc des arbres. <i>Annales des Sciences forestières</i> 42, 193–200. A new method of sap flow measurement in tree trunks (English translation)	53 61
B3	Atmospheric profile measurements	
	Thornthwaite, C. W. & Holzman, B. (1939) The determination of evaporation from land and water surfaces. <i>Monthly Weather Rev.</i> 67, 4–11.	64

Contents

B4 & B5	Eddy correlation	
B4	Swinbank, W. C. (1951) The measurement of vertical transfer of heat and water vapor by eddies in the lower atmosphere. <i>J. Meteorology</i> 8, 135–145.	74
B5	Dyer, A. J. (1961) Measurements of evaporation and heat transfer in the lower atmosphere by an automatic eddy-correlation technique. <i>Quart. J. Royal Met. Soc.</i> 87, 401–412.	85
B6	Micrometeorological source area Gash, J. H. C. (1986) A note on estimating the effect of a limited fetch on micrometeorological evaporation measurements. <i>Boundary-Layer Met.</i> 35, 409–413.	98
B7	Scintillometry Lagouarde, J. P., McAneney, K. J. & Green, A. E. (1996) Scintillometer measurements of sensible heat flux over heterogeneous surfaces. In: <i>Scaling up in Hydrology Using Remote Sensing</i> (ed. by J. B. Stewart, E. T. Engman, R. A. Feddes & Y. Kerr), 147–160. Wiley, Chichester, UK.	103

Estimating Evaporation

C	Atmospheric Control on the Evaporation Process – Commentary	117
C1	The fundamental equation of evaporation Dalton, J. (1802) On evaporation. Essay III in: <i>Experimental essays on the constitution of mixed gases; on the force of steam or vapour from water or other liquids in different temperatures; both in a Torrecellian vacuum and in air; on evaporation; and on the expansion of gases by heat.</i> <i>Mem. Proc. Lit. Phil. Soc. Manchester</i> , 5, part 2, 574–594.	121
C2	The concept of potential evaporation Thornthwaite, C. W. (1948) An approach toward a rational classification of climate. <i>Geographical Rev.</i> 38, 55–94.	142
C3	The combination equation Penman, H. L. (1948) Natural evaporation from open water, bare soil and grass. <i>Proc. Royal Soc. London A</i> 193, 120–145.	186
C4	The approach to equilibrium evaporation Priestley, C. H. B. & Taylor, R. J. (1972) On the assessment of surface heat flux and evaporation using large scale parameters. <i>Monthly Weather Rev.</i> 100, 81–92.	213
C5	Evaporation into the convective boundary layer de Bruin, H. A. R. (1983) A model of the Priestley-Taylor parameter, α . <i>J. Appl. Met.</i> 22, 572–578.	225
D	Vegetation Controls on Evaporation – Commentary	233
	Interception	
D1	The effect of upland afforestation Law, F. (1958) Measurements of rainfall, interception and evaporation losses in a plantation of Sitka spruce trees. In: <i>IAHS General Assembly, Toronto</i> , vol. 2, 397–411. IAHS Publ. 44, IAHS Press, Wallingford, UK.	240

Contents

D2	Evaporation as the driver of interception loss	
	Horton, R. E. (1919) Rainfall interception. <i>Monthly Weather Rev.</i> 47, 603–623.	255
D3	Intercepted rainfall and the surface energy balance	
	Rutter, A. J. (1967) An analysis of evaporation from a stand of Scots pine. In: <i>International Symposium on Forest Hydrology</i> (ed. by W. E. Sopper & H. W. Lull), 403–416. Pergamon Press, Oxford, UK.	278
D4	Modelling interception as an evaporation-driven process	
	Rutter, A. J., Kershaw, K. A., Robins, P. C. & Morton, A. J. (1971) A predictive model of rainfall interception in forests, I. Derivation of the model from observations in a stand of Corsican pine. <i>Agric. Met.</i> 9, 367–384.	292
D5	Measurement of wet canopy evaporation	
	Stewart, J. B. (1977) Evaporation from the wet canopy of a pine forest. <i>Water Resour. Res.</i> 13, 915–921.	309
D6	Expressing the essence of the process in a simple formula	
	Gash, J. H. C. (1979) An analytical model of rainfall interception in forests. <i>Quart. J. Royal Met. Soc.</i> 105, 43–55.	316
D7	Explaining the difference between evaporation from forest and grass	
	Shuttleworth, W. J. & Calder, I. R. (1979) Has the Priestley-Taylor equation any relevance to forest evaporation? <i>J. Appl. Met.</i> 18, 639–646.	329
Transpiration		
D8	The big leaf model	
	Monteith, J. L. (1965) Evaporation and environment. In: <i>The State and Movement of Water in Living Organisms</i> (Proc. 19th Symp. Soc. Exp. Biol., Swansea 1964), 205–234. Academic Press, for The Society for Experimental Biology, UK.	337
D9	Stomatal response	
	Jarvis, P. G. (1976) The interpretation of the variations in leaf water potential and stomatal conductance found in canopies in the field. <i>Phil. Trans. Royal Soc. London B</i> 273, 593–610.	367
D10	Introducing photosynthesis	
	Ball, J. T., Woodrow, I. E. & Berry, J. A. (1986) A model predicting stomatal conductance and its contribution to the control of photosynthesis under different environmental conditions. In: <i>Progress in Photosynthesis Research</i> , vol. 4 (ed. by J. Biggins), 221–224. Martinus Nijhof, The Netherlands.	385
D11	Sparse crops	
	Shuttleworth, W. J. & Wallace, J. S. (1985) Evaporation from sparse crops – an energy combination theory. <i>Quart. J. Royal Met. Soc.</i> 111, 839–855.	389
E	Evaporation as a Component of the Global Climate System – Commentary	407
E1	Evaporation in a global climate model	
	Dickinson, R. E., Henderson-Sellers, A., Kennedy, P. J. & Wilson, M. F. (1986) Biosphere Atmosphere Transfer Scheme (BATS) for the NCAR Community Climate Model. <i>NCAR Technical Note</i> , NCAR/TN-275 + STR.	410

Contents

- E2 Evaporation data to support climate modelling 487
Shuttleworth, W. J., Gash, J. H. C., Lloyd, C. R., Moore, C. J., Roberts, J., Marques, A. de O., Fisch, G., Silva, V. de P., Ribeiro, N. M. G., Molion, L. C. B., de Abreu Sa, L. D., Nobre, J. C., Cabral, O. M. R., Patel, S. R. & de Moraes, J. C.
(1984) Eddy correlation measurements of energy partition for Amazonian forest. *Quart. J. Royal Met. Soc.* 110, 1143–1162.
- E3 Land-surface/atmosphere interaction at the GCM grid scale 507
de Bruin, H. A. R. (1989) Physical aspects of the planetary boundary layer. In: *Estimation of Areal Evaporation* (ed. by T. A. Black, D. L. Spittlehouse, M. D. Novak & D. T. Price), 117–132. IAHS Publication 177. IAHS Press, Wallingford, UK.
