Series Editor's Foreword *by Jeffrey J. McDonnell*

Introduction 1

A Personal Synthesis 1

Commentaries and Papers 16

The first page number is that of the commentary, the second is that of the paper.

- Paper 1** *Fisher, O.* (1866) On the disintegration of a chalk cliff. 16
Geological Magazine 3, 354–356. 37
- Paper 2** *Gilbert, G. K.* (1877) *Report on the Geology of the Henry Mountains.* 17
US Geographical and Geological Survey of the Rocky Mountain Region. Department 40
of the Interior, Washington DC, USA. 160 pp. Title page only.
- Paper 3** *Darwin, C.* (1881) *The Formation of Vegetable Mould, through the Action of Worms, with Observations on their Habits.* 17
John Murray, London, UK. 326 pp. Title page only. 41
- Paper 4** *Davison, C.* (1889) On the creeping of the soilcap through the action of frost. 18
Geological Magazine 6, 255–261.
- Paper 5** *Gilbert, G. K.* (1909) The convexity of hilltops. 18
Journal of Geology 17, 344–350.
- Paper 6** *Bryan, K.* (1922) Erosion and sedimentation in the Papago country, Arizona. 19
In: *United States Geological Survey Bulletin* 730, 19–90. Excerpt: p.19–20.
- Paper 7** *Meginnis, H. G.* (1935) Effect of cover on surface run-off and erosion in the loessial 19
uplands of Mississippi.
United States Department of Agriculture, Circular 347, 15pp.
- Paper 8** *Sharpe, C. F. S.* (1938) *Landslides and Related Phenomena.* 20
Columbia University Press, New York, USA. 137 pp. Excerpt p.16–48.
- Paper 9** *Twenhofel, W. H.* (1939) The cost of soil in rock and time. 21
American Journal of Science 237, 771–780
- Paper 10** *Hack, J. T.* (1942) *The Changing Physical Environment of the Hopi Indians of* 21
Arizona. Papers of the Peabody Museum of American Archaeology and Ethnology,
Harvard University 35, no. 1, 1–85. Title page only.
- Paper 11** *Horton, R. E.* (1945) Erosional development of streams and their drainage basins: 21
hydrophysical approach to quantitative morphology.
Geological Society of America Bulletin 56, 275–370. Excerpt: p.281–291.
- Paper 12** *van Burkalow, A.* (1945) Angle of repose and angle of sliding friction: an 22
experimental study.
Geological Society of America Bulletin 56, 669–708. Excerpt: p.669–670.
- Paper 13** *Musgrave, G. W.* (1947) Quantitative evaluation of factors in water erosion – a first 23
approximation.
Journal of Soil and Water Conservation 2, 133–138, and 170.

Contents

Paper 14	Ellison, W. D. (1950) Soil erosion by rainstorms. <i>Science</i> 111, 245–249.	23
Paper 15	Savigear, R. A. G. (1952) Some observations on slope development in South Wales. <i>Transactions of the Institute of British Geographers</i> 18, 31–51.	23
Paper 16	Strahler, A. N. (1952) Hypsometric (area–altitude) analysis of erosional topography. <i>Geological Society of America Bulletin</i> 63, 1117–1142.	23
Paper 17	Koons, D. (1955) Cliff retreat in Southwestern United States. <i>American Journal of Science</i> 253, 44–52.	24
Paper 18	Yatsu, E. (1955) On the longitudinal profile of the graded river. <i>Transactions, American Geophysical Union</i> 36, 655–663.	24
Paper 19	Schumm, S. A. (1956) Evolution of drainage systems and slopes in badlands at Perth Amboy, New Jersey. <i>Geological Society of America Bulletin</i> 67, 597–646. First page only.	24
Paper 20	Hack, J. T. (1957) Studies of Longitudinal Stream Profiles in Virginia and Maryland. <i>United States Geological Survey, Professional Paper 294-B</i> . Excerpt: p.49–64.	25
Paper 21	Langbein, W. B. & Schumm, S. A. (1958) Yield of sediment in relation to mean annual precipitation. <i>Transactions, American Geophysical Union</i> 39, 1076–1084.	25
Paper 22	Berry, L. & Ruxton, B. P. (1959) Notes on weathering zones and soils on granitic rocks in two tropical regions. <i>Journal of Soil Science</i> 10, 54–63.	25
Paper 23	Fournier, F. (1960) <i>Climat et érosion: la relation entre l'érosion du sol par l'eau et les précipitations atmosphériques.</i> Presses Universitaires de France, Paris, France. 201pp. Title page only.	26
Paper 24	Hack, J. T. & Goodlett, J. C. (1960) Geomorphology and Forest Ecology of a Mountain Region in the Central Appalachians. <i>United States Geological Survey Paper 347</i> , 46 pp. Excerpt: p.1–17.	26
Paper 25	Rapp, A. (1960) Recent developments of mountain slopes in Kärkevagge and surroundings, northern Scandinavia. <i>Geografiska Annaler</i> 42, 71–200. Excerpts: p.73–80; p.184–187.	26
Paper 26	Wolman, M. G. & Miller, J. P. (1960) Magnitude and frequency of forces in geomorphic processes. <i>Journal of Geology</i> 68, 54–74.	26
Paper 27	Miller, J. P. (1961) Solutes in small streams draining single rock types, Sangre de Cristo Range, New Mexico. <i>United States Geological Survey, Water Supply Paper 1535-F</i> , F1–F23.	27
Paper 28	Scheidegger, A. E. (1961) Mathematical models of slope development. <i>Geological Society of America Bulletin</i> 72, 37–49.	27
Paper 29	Terzaghi, K. (1962) Stability of steep slopes on hard unweathered rock. <i>Géotechnique</i> 12, 251–270.	27
Paper 30	Culling, W. E. H. (1963) Soil creep and the development of hillside slopes. <i>Journal of Geology</i> 71, 127–161. Excerpt: p.130–154.	28
Paper 31	Langbein, W. B. & Dawdy, D. R. (1964) Occurrence of dissolved solids in surface waters in the United States. <i>United States Geological Survey, Professional Paper 501-D</i> , D115–D117.	28

Contents

Paper 32	Skempton, A. W. (1964) The long term stability of clay slopes. <i>Géotechnique</i> 14, 77–102.	29
Paper 33	Melton, M. A. (1965) Debris-covered hillslopes of the southern Arizona desert— consideration of their stability and sediment contribution. <i>Journal of Geology</i> 73, 715–729	29
Paper 34	Shreve, R. L. (1966) Statistical law of stream numbers. <i>Journal of Geology</i> 74, 17–37.	29
Paper 35	Hooke, R. LeB. (1967) Processes on arid-region alluvial fans. <i>Journal of Geology</i> 75, 438–460.	30
Paper 36	Hutchinson, J. N. (1967) The free degradation of London Clay cliffs. <i>Proceedings of the Geotechnical Conference, Oslo 1967, on Shear Strength Properties of Natural Soils and Rocks</i> , volume 1, 113–118.	30
Paper 37	Kojan, E. (1967) Mechanics and rates of natural soil creep. In: <i>Proceedings of the Fifth Annual Engineering Geology and Soil Engineering Symposium</i> (Pocatello, Idaho), 233–253. United States Forest Service Experimental Station, Berkeley, California.	30
Paper 38	Bricker, O. P., Godfrey, A. E. & Cleaves, E. T. (1968) Mineral–water interaction during the chemical weathering of silicates. In: <i>Trace Inorganics in Water</i> , 128–142. Advances in Chemistry Series no 73. American Chemical Society.	30
Paper 39	Gregory, K. J. & Walling, D. E. (1968) The variation of drainage density within a catchment. <i>Bulletin of the International Association for Scientific Hydrology</i> 13, 61–68.	31
Paper 40	Ahnert, F. (1970) Functional relationships between denudation, relief, and uplift in large, mid-latitude drainage basins. <i>American Journal of Science</i> 268, 243–263.	31
Paper 41	Carson, M. A. & Petley, D. J. (1970) The existence of threshold hillslopes in the denudation of the landscape. <i>Transactions of the Institute of British Geographers</i> 49, 71–94.	31
Paper 42	Smith, T. R. & Bretherton, F. P. (1972) Stability and the conservation of mass in drainage basin evolution. <i>Water Resources Research</i> 8(6), 1506–1529.	32
Paper 43	Ahnert, F. (1976) Brief description of a comprehensive three-dimensional process- response model of landform development. <i>Zeitschrifte für Geomorphologie N. F.</i> , Suppl. Bd. 25, 29–49.	32
Paper 44	Dunne, T. & Aubry, B. F. (1986) Evaluation of Horton's theory of sheetwash and rill erosion on the basis of field experiments. In: <i>Hillslope Processes</i> (edited by A. D. Abrahams), 31–53. Allen & Unwin, London, UK.	33
