

## Contents

Foreword <i>by J. C. Rodda</i> .....	iii
Preface .....	v

### CHAPTER 1

#### **An Outline of the Nile Basin**

Introduction .....	1
Extent of the Nile basin .....	1
Rainfall and runoff .....	3
Main tributaries .....	5
White Nile .....	5
Blue Nile and main Nile .....	6

### CHAPTER 2

#### **Early Studies and Flow Measurement**

Introduction .....	8
Early investigations .....	8
Establishment of the hydrological network .....	11
Numbers of gauging stations .....	12
Collaboration with other hydrological services .....	15
Records available at key sites .....	16

### CHAPTER 3

#### **The Lake Victoria Basin**

Introduction .....	18
Early studies of the water balance .....	18
The Kagera basin .....	20
Lakes and swamps in lower Kagera .....	21
Contribution of other tributaries .....	23
Rainfall over Lake Victoria .....	25
Evaporation .....	27
Lake levels .....	28
Lake Victoria outflows .....	28
Water balance of Lake Victoria .....	30
The WMO/UNDP Hydrometeorological Survey .....	31
Reviews by the Institute of Hydrology .....	31
Long-term Lake Victoria balance .....	33
Downstream influence .....	35

## CHAPTER 4

**The East African Lakes below Lake Victoria**

Introduction .....	37
Geography of the lake system .....	37
Early water balance observations .....	39
General climate of Lake Kyoga and Lake Albert basins .....	39
Published flow records .....	40
Main Nile between Lake Kyoga and Lake Albert .....	40
Semliki at Bweramule .....	40
Lake Albert outflows .....	41
Review of river flows at key sites .....	41
Lake Kyoga outflows at Masindi Port .....	41
River flows at Kamdini .....	42
Comparison of flows at Masindi Port and Kamdini .....	43
Comparisons of inflows and outflows for Lake Kyoga .....	43
Water balance of Lake Kyoga .....	45
Lakes Edward and George .....	48
Lake Albert .....	49
Kyoga Nile inflows .....	49
Semliki and local inflows .....	49
Albert Nile outflows .....	50
Other components of Lake Albert balance .....	50
Water balance .....	51
The surroundings of Lake Albert .....	53
Potential of Lake Albert as a reservoir .....	53
Effect on flows of Lake Kyoga and Lake Albert basins .....	53

## CHAPTER 5

**The Bahr el Jebel and the Sudd**

Introduction .....	57
Early studies .....	60
Studies of the Jonglei Canal .....	61
Flows of the Bahr el Jebel .....	64
Available river flow records .....	64
Published river flow records .....	65
The Bahr el Jebel swamps .....	67
The influence of topography .....	68
The flooding regime .....	70
Study of a sample reach .....	73
Hydrological model of the Sudd .....	73
The hydrological model .....	74
Effect on areas of seasonal flooding .....	75
Hydrological control of flood-plain vegetation .....	76
Early observations and botanical studies .....	76
Botanical studies of the Jonglei Investigation Team .....	77

Juba-Bor survey .....	77
Description of flooding mechanism .....	79
Statistical analysis of vegetation distribution .....	79
Effect of rise in Lake Victoria .....	82
Importance of seasonal flooding to grazing .....	83
Effects of the Jonglei Canal .....	84
Assessment of the effects of the Jonglei Canal .....	84
Conclusion .....	87

## CHAPTER 6

**The Bahr el Ghazal Basin**

Introduction .....	88
Early studies .....	88
Physical background .....	88
River profile .....	89
Early water balance .....	89
Estimates of tributary inflow .....	90
Topics for investigation .....	91
Available flow records .....	91
Flows estimated for the MIT study .....	92
Revised analysis of available river flow records .....	93
Derivation of total inflow series .....	94
Other water balance elements .....	96
Spill from Bahr el Jebel to Bahr el Ghazal .....	96
Area of Bahr el Ghazal swamps .....	96
The water balance model .....	98
Distribution of wetlands .....	99
Plans for reducing losses in the Bahr el Ghazal basin .....	102
Conclusion .....	102

## CHAPTER 7

**The Sobat Basin and the Machar Marshes**

Introduction .....	103
Geography of the Sobat basin .....	103
General hydrology .....	104
Spill from the Sobat tributaries .....	104
The Machar marshes .....	106
Contributions of the Pibor .....	109
Spill from Baro to Machar marshes .....	109
Balance of Sobat channel .....	110
Water balance of the Machar marshes .....	111
Analysis by Hurst (1950) .....	111
Jonglei Investigation Team (1954) .....	111
Analysis by MIT (1980) .....	113
Analysis of years 1950-1955 (after Sutcliffe, 1993) .....	114

General environment .....	115
Analysis of Sobat channel storage .....	116
Runoff from the eastern plain .....	117
Conclusions .....	118

## CHAPTER 8

**The White Nile below Malakal**

Introduction .....	119
Inflows to the White Nile .....	119
Outflows from the White Nile .....	121
Water balance of the White Nile from Malakal to Renk .....	122
Trends of losses on the White Nile .....	124
Vegetation of the White Nile flood plain .....	124
Effect of water-saving projects .....	126
Conclusion .....	126

## CHAPTER 9

**The Blue Nile and its Tributaries**

Introduction .....	127
Geography of the basin .....	127
Rainfall and evaporation .....	130
Availability of flow records .....	130
Flows at various sites on the Blue Nile .....	135
Losses between Roseires and Khartoum .....	137
Flood regime .....	138
Flow forecasting systems .....	139
Sedimentation .....	140
Operation of Blue Nile reservoirs .....	140
Conclusions .....	141

## CHAPTER 10

**The Atbara and Main Nile to Wadi Halfa**

Introduction .....	142
Topography .....	142
Land use and climate .....	143
Early account of the hydrology of the reach from Khartoum to Wadi Halfa .....	144
Available flow records .....	144
Flow measurements .....	145
Hydrology of individual components .....	146
Comparisons of inflows and outflows .....	148
Conclusions .....	149

CHAPTER 11  
**The Main Nile in Egypt**

Introduction .....	151
Flow records at Aswan .....	151
Comparison with upstream flows .....	153
The genesis of the Aswan High Dam .....	154
Elimination of flood reserve .....	155
The effects of the Aswan High Dam .....	155
Flows down the Nile below Aswan .....	156
Evidence of the Roda gauge .....	158
Conclusion .....	160

CHAPTER 12  
**The Nile and Hydrological Aspects of Water Use**

Introduction .....	161
Summary of flow series .....	161
Water use in the Nile basin .....	165
East Africa .....	168
Rwanda, Burundi and Congo .....	168
Uganda, Kenya and Tanzania .....	169
Ethiopia and Eritrea .....	170
Sudan .....	171
Egypt .....	171
Projects to increase river flows .....	172
Conclusion .....	173
