### **2014 Vienna Catchment Science Symposium**

**Start date:** 03/05/2014

**Location:** Vienna, Austria

This one-day meeting directly follows the EGU meeting in Vienna.

It is a small informal meeting focused around several full-length talks, workshops and a lot of unstructured conversation, as a contrast to the frenzy of 15-minute talks and countless posters at EGU. The overall theme is "*Mainstreaming historical hydrology*".

Speakers:

- **Jürg Luterbacher** (Historical hydroclimatology)
- **Rudolf Brazdil** (Historical process hydrology)
- **Rui Perdigao** and **Andrea Kiss** (Historical, stochastic hydrology)
- **Mariano Barriendos** (Historical hydrology and decision making).

The symposium has been modelled after the Berkeley Meeting Jim Kirchner has been organising, and we held similar meetings after EGU in past years.

*Doors will open at 8:30 am* with coffee, breakfast pastries and greetings. The meeting will start at 8:45 am, featuring ~40 minute talks and extended discussion, with breaks in between for lunch and snacks. In the afternoon we will have small group discussion sessions to allow more in depth discussion of Mainstreaming historical hydrology.

The day will finish off with an exchange of group findings, followed by drinks and dinner.

The Meeting will be held in the Kuppelsaal of the Vienna University of Technology ([www.tuwien.ac.at](http://www.tuwien.ac.at)).

Free food and drinks will be served. To make arrangements we need to know who will attend. Please

sign up no later than **15 April** by writing an email to **Dr. Andrea Kiss** [kiss@hydro.tuwien.ac.at](mailto:kiss@hydro.tuwien.ac.at)

## **HYDROLOGICAL SCIENCES AND WATER SECURITY: PAST, PRESENT AND FUTURE**

16-17 June, Room IV (Fontenoy), UNESCO Headquarters, Paris, France, jointly organized by UNESCO IHP and IAHS

This Colloquium is the continuation of a series of biennial international scientific meetings organized jointly by the International Hydrological Programme (IHP) of UNESCO and the International Association of Hydrological Sciences (IAHS) in the most challenging fields of water resources research.

The Colloquium will address the emergence and development of water security concepts over the past decades, the state of present day ideas and opinions, and will look to likely developments in the future. Of particular importance will be inclusion of the new IAHS decade of research Panta Rhei Change in Hydrology and Society and its relevance to Water Security.

The Colloquium will combine invited papers with a panel discussion and a poster session.

**Day 1: Monday 16 June 2014**

### **FCERM Network Annual Assembly**

**Dates:** 19/06/2014 09:00 - 20/06/2014 17:00

**Location:** Edinburgh, UK

The 2014 Annual Assembly brings together a diverse range of professionals from across the Flood Risk Management sector, as well as those working in related disciplines. The event aims to:

1. Share information about on-going research in FCERM and identify knowledge gaps
2. Develop a dialogue between research and research users
3. Create opportunities for networking and the development of novel research ideas
4. Provide support and encourage development of research students and early career researchers in FCERM

Invitation to Share your Work

The Assembly will begin with an overview of the research currently being carried out across the FCERM sector. To ensure maximum coverage we would like all those involved in research, whether from the university, policy or commercial sectors to volunteer a contribution to this activity. The contribution will take the form of a single page extended abstract, a 2 minute elevator pitch supported by up to 4 PowerPoint slides and a poster presentation of your research.

To note your interest in highlighting your research activity please indicate this on the appropriate part of the registration form (link below).

Conference Dinner

We have organised a conference dinner on the evening of Thursday 19 of June. The dinner is free to attend, but please let us know on your registration form if you intend to join us for dinner, and if you have any special dietary requirements.

#### Accommodation

We have reserved accommodation on campus for those of you who will be travelling to the conference. Availability is limited, so if you would like to apply for accommodation on campus, please indicate this on your registrations form.

We will cover the costs of accommodation and travel for staff and students at UK research institutions. Regrettably those from private sector companies will have to cover their own travel and accommodation costs.

## **Our common future under climate change**

**Dates:** 07/07/2015 - 10/07/2015

**Location:** Paris, France

IAHS co-convenes sessions on Freshwater at the International Scientific Conference Our common future under climate change, 7-10 July 2015, Paris, France, the largest scientific event ahead of the UNFCCC COP21 negotiations to be held in December 2015.

Climate change and freshwater - 1: State of knowledge / 2: Shaping the future

Convening partners: IAHS-UNESCO-WMO-French research coordination Allenvi

The freshwater cycle, including groundwater, is embedded in the climatic system. The freshwater cycle is also a strong structural and functional driver linking processes, locations, scales, uses and hazards, and socio-institutional entities and dynamics. The freshwater cycle also provides a key interface between the atmosphere, the geosphere, the biosphere and the anthroposphere; and between the basic needs, especially for water, food, energy and health. Although the fundamental physics behind climate processes is rather straightforward, the impact of climate change on local water resources is difficult to quantify with limited uncertainty (IPCC 2014).

Two sessions will address these issues across the first days of the conference, with a conceptual progression from actual knowledge towards approaches to shape the future.

Most of us work on one or a few aspects of the different environmental risks we face ranging from anthropogenic, environmental and geospheric hazards to societal perception of such risks. At this conference we hope to set the stage for future risk assessments to go well beyond current localized, primarily single stressor-based assessments, to consider the multiple stressors affecting our environment and ourselves. The conference have keynote

talks by internationally-recognized experts in advance of discussions in breakout and plenary sessions, and we invite you to contribute by presenting your area of expertise and knowledge in these discussions. We also encourage you to submit an abstract for a poster presentation of your experience with innovative methods for risk assessment and management.

Registration and abstract deadline: 10-Oct 2015.

## **Runoff Predictions in Ungauged Basins (PUB) Summer Short Course**

**Dates:** 06/06/2016 - 10/06/2016

**Location:** Fort Collins, Colorado, USA

This course is aimed at training students in methods to estimate streamflow at ungauged locations across different time and spatial scales. Students will be introduced to approaches through a series of lectures that are supplemented by complimentary in-class exercises using data and catchments from the United States. Through this combination of lectures and hands-on experiences, the course will emphasize the larger concepts of catchment processes and behavior and deepen the students' understanding of catchment hydrology.

## **Summer school on “Hydrometeorological extremes: processes, models and human impacts”**

**Dates:** 06/07/2017 - 12/07/2017

**Location:** Cagliari, Italy

Under the Visiting Scientist funding programme of the University of Cagliari (Italy), a Summer school on “Hydrometeorological extremes: processes, models and human impacts” will take place on July 6–12, 2017 in Cagliari. The summer school is organized with the sponsorship of the Italian Hydrological Society (SII), the Hydraulic Italian Group (GII), and the Italian Universities Consortium for Hydrology (CINID), and is addressed to PhD students and young researchers. The course is organized in two modules: “Hydrological extremes and human societies” with lecturer Prof. Giuliano Di Baldassarre (Uppsala University, Sweden) and “The WRF-Hydro modeling system” with lecturer Prof. Giuseppe Mascaro (Arizona State University, Tempe, AZ).

The school is free of charge, but participants should cover their travel and accommodation expenses.

Deadline for application: June 15, 2017

## **Seventh International Conference on Flood Management**

**Dates:** 05/09/2017 - 07/09/2017

**Location:** Leeds, UK

Session: A Panta Rhei perspective on changes in flood risk

Due to expected further increases of flood damage, many countries reconsider their policies and strategies for flood risk management. This requires more knowledge and detailed analyses of changing flood risk, projections of future flood losses and assessments of risk management alternatives. To support such assessments, the IAHS Panta Rhei working group "Changes in flood risk" aims at understanding, quantifying and modelling the linkages between physical or socio-economic drivers and changes in flood risk as well as analyzing risk management strategies. The main aim of this session is to present and discuss results from various countries and disciplines on changing flood risk and risk management. Abstracts are invited for contributions that cover research as well as practical implementation of risk assessment and management.
