

Science for solutions: HELPING

Working Group on URBAN WATER: Urbanization phenomenon and adequate water management strategies

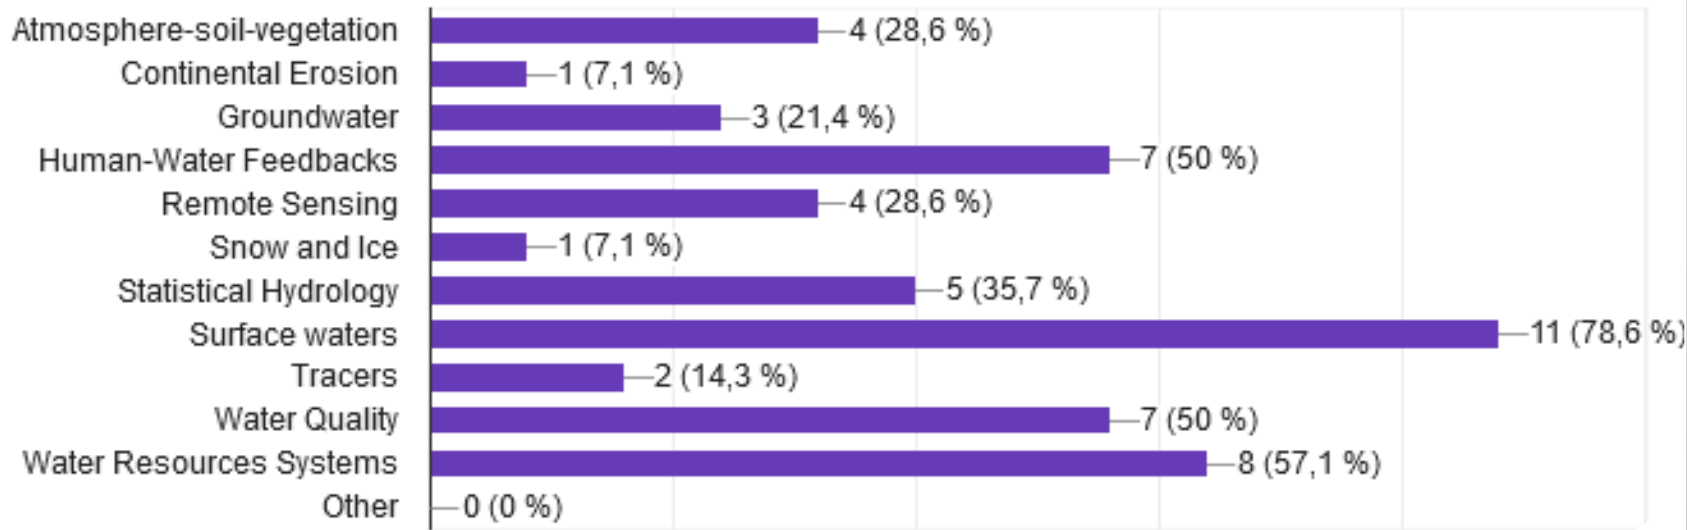

November 2nd, 2023

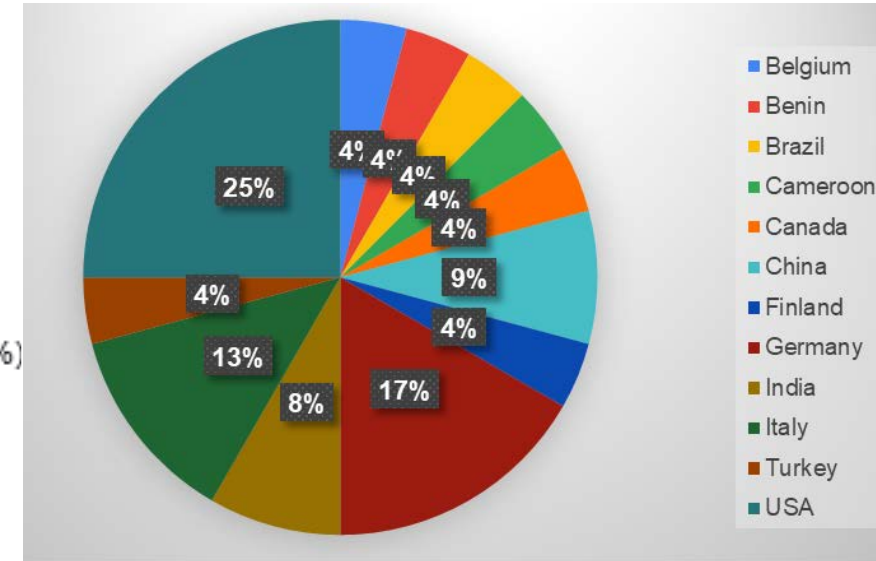

IAHS

About us

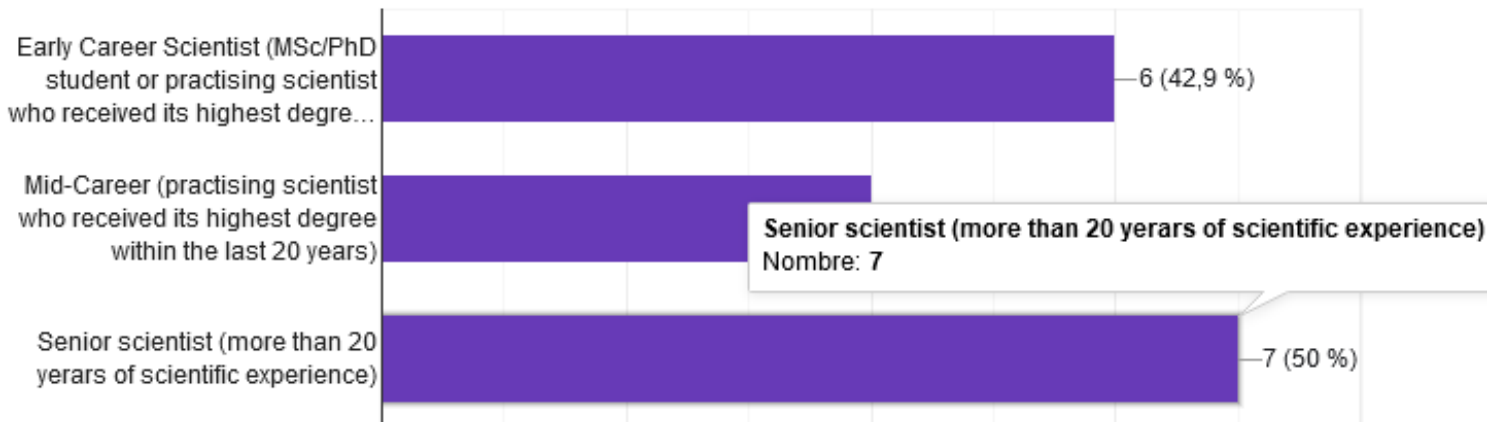

An interdisciplinary group

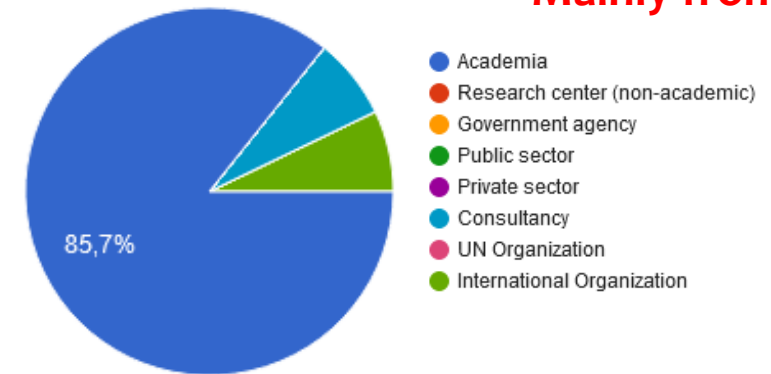

Researchers from almost every region of the world

Various researchers profiles

Mainly from academia

Objectives

- To build a common vision of hydrological research in urban areas all over the world.
- To raise awareness on challenges specific to urban areas and the impacts on freshwater resources
- To strengthen collaboration and share experiences from diverse regions over the world
- To contribute for a better management of urban water resources and risks mitigation

Activities for the first two years

- Writing of a proposal for an international research project and looking for funding
- Developing scientific visits/exchanges among members of the group to build a strong community
- Writing an **Opinion paper**
- Organizing a **summer school**

Thank You
