

Ensuring Evidence-Based Findings

Benjamin Wullobayi Dekongmen

IAHS

Why?

Ensuring Evidence-Based Findings: Is paramount in conducting hydrological research around the globe for many reasons.

-It enhances strategies, knowledge and skills in capacity building, policy drafting and implementation.

Some Reasons

- Accuracy and Reliability
- Policy and decision-making
- Enhanced Predictability
- Stakeholders Trust
- Integration into several fields
- Continuous Improvement

Way forwards

- Collaboration with data sources; government agencies, hydropower generation systems, NGOs, Datasets portals ...etc.
- Calibration and Validation of data
- Open Science / Open Source
- Review of methodologies

Literature Review

Reporting

Strategies to connect researchers with Data Sources?

Thank You
