of Hydrological Sciences

Hydrology

MEMORANDUM OF UNDERSTANDING

between

The Hydrology Section of the American Geophysical Union

and

The International Association of Hydrological Sciences (IAHS)

The Hydrology Section of the American Geophysical Union (AGU) and the International Association of Hydrological Sciences (IAHS/AISH) recognise that a closer relationship between the two organisations can foster international exchange in hydrological research and learning and promote international opportunities in hydrology for members of both organisations. To that effect the organisations will promote the following activities:

- an exchange of information and possible co-organization or reciprocal support to research initiatives and programmes;
- an exchange of information and possible co-organization of scientific conferences and workshops;
- an exchange of information and possible joint activities concerning educational opportunities, student programs, and professional services;
- an expansion of membership of both organizations through networking activities and possible joint programs.

In recognition of the mutual interests among their members and as a means of furthering the common goals and objectives of both organisations, the collaborations are carried out under the following terms:

- neither organisation shall have any financial obligation to the other;
- both organisations will seek collaboration where appropriate;
- the respective leadership will meet (in person or electronically) on a regular basis to discuss issues of mutual interest.

The agreement is intended to help further the goals and objectives of both organizations through collaboration and to advance hydrological sciences in every aspect.

This agreement may be dissolved by either organisation at any time with 30 days notice.

This agreement shall be reviewed every four years.

Prof. Günter Blöschl
President IAHS

Prof. Jeffrey McDonnell
President AGU Hydrology Section
