

IYFSWC and ICCE symposium 2018
«Climate Change Impacts on Sediment Dynamics: Measurement, Modeling and Management»

MOSCOW
27-31 AUGUST 2018

Dear colleagues!

There is now less than 1 month to the abstract submission deadline for Second International Youth Forum on Soil and Water Conservation (2nd IYFSWC) and ICCE symposium 2018 "Climate Change Impacts on Sediment Dynamics: Measurement, Modelling and Management".

Abstract submission deadline: 15 March 2018

Registration & fee payment deadline (early bird): 01 May 2018

The Second International Youth Forum on Soil and Water Conservation (2nd IYFSWC) and ICCE symposium 2018 "Climate Change Impacts on Sediment Dynamics: Measurement, Modelling and Management" will be held in August 27-31, 2018, in Moscow, Russia.

The conference will address the following topics:

- Challenges/actions of soil and water management in the changing world
- Mechanism/processes and modelling of soil degradation
- Innovation of technology of soil and water conservation
- Ecological restoration and regional sustainable development
- The role youth can play in soil and water conservation
- Climate change as a driver of erosion, sediment dynamics, and river morphology transformation
- Influence of climate change on water quality and drinking water treatment and supply
- Erosion and sediment transport models and river basin management tools

Training course for young water professionals «Water-related natural hazards: measurement and modelling» will take place as part of the conference program.
