

Tenth International Symposium on Land Subsidence
20 - 24 April 2020, The Netherlands

10th International Symposium on Land Subsidence

New innovative
technologies
and approaches
are needed

Call for abstracts

TISOLS2020 intends to bring together
300+ international experts to share the
latest research and insights on natural
and anthropogenic land-level lowering.

Abstract submission deadline

Authors are invited to submit
abstracts in English by **12 May 2019** to
[TISOLS2020 website](http://www.tisols2020.org)

For submission details
and updates refer to
www.tisols2020.org

On behalf of the Scientific Committee, you are cordially invited to submit abstracts of 400 words for the following themes:

- Measuring and Monitoring of subsidence,
- Understanding subsidence Mechanisms,
- Modelling of subsidence (predictive and inverse),
- Impacts of subsidence,
- Measures and coping strategies: mitigation and adaptation.

There is no specific format for the abstract, but it should contain

1. the paper title (max 30 words)
2. the names and affiliations of the authors
(incl. contact data for the corresponding author)
3. a brief description of the work to be presented and the conference
4. theme(s) the work addresses.

The official language is English.

The Scientific Committee will review the abstracts to assess their relevance to the symposium, the originality of the work, and its potential contribution to engineering science or practice.

On behalf of the organizers of TISOLS2020,

Peter Fokker
Chairman of the
Scientific Committee

Gilles Erkens
Chairman of the
Organising Committee
