Summary of the activity of the Panta Rhei Working Groups – Year 2014

Title of the Working Group: Drought in the Anthropocene

Report of the activity of the working group in 2014

In 2014 our group established itself and grew to 24 members. We had some initial discussions via email about the WG proposal, scope, meetings and additional members. Some of us met at the EGU Leonardo conference on HYPER droughts in November in Prague and we had a Panta Rhei Drought group lunch at AGU in San Francisco in December. There we discussed our work and plans for the future and set dates for future meetings. We also started a new session at EGU called “Droughts in the Anthropocene” and at AGU we discussed who we wanted to invite for that session.

Description of the opportunities provided by Panta Rhei

At this stage mainly getting to know each other and setting up new collaborations and data sharing. We think that using the Panta Rhei theme in the EGU session description might have helped to get more abstracts.

Suggestions for the future development of Panta Rhei

We would like to have a webpage with our working group where we can post news, start discussions, etc.
