

Dr Danumah SYSTA Report

The 27th General Assembly of IUGG at the Palais des Congrès in Montreal, Canada, attended by the financial support of the SYSTA Award. During this assembly different oral presentation and poster sessions have been done under IAHS section mainly in hydrogeology and hydrology related to climate change, water scarcity, flood forecasting, etc. In addition, there were three workshop that I attended organized by IAHS at the same time such as using R in hydrology, how to write an article and research communication. I made my oral presentation and established network with young scientists and students awarded by IAHS.

Besides to all of that, I attended the plenary session organized by IAHS where presentations and prizes were given in various award categories. Also, I attended SYSTA Mentoring meeting to share challenges that each of us face in our own country to get fund for research.

Presentation: Flash Flood Risk Modelling By Multicriteria Analysis Approach And Using Geoinformation Techniques In Cocody (Cote D'ivoire) in session H16 - Floods: Processes, Forecasts, Probabilities, Impact Assessments and Management.
