

## **Report of Participation at the 4th Friend Water Conference on the Hydrology of the Great Rivers of Africa**

The 4th International Conference on "Hydrology of The Great Rivers of Africa", took place from 13 to 20 November 2021 in Cotonou, Benin. The program was very rich. The field trainings in hydrometry brought me so much. On the floor, I presented a paper entitled "Quantification of water related soil erosion of the Bia", published in PIAHS n°384. Moreover, it allowed me to discuss and debate the different aspects related to my topic. In addition, we had with Dr. Venyo Akpataku (Togo), a particular experience as organizers of the [Young Hydrologistes Society](#) at the Beginning of their Career, on Wednesday 17 November 2021 from 6 to 7 pm, a training on "how to write an article in hydrology" whose speakers were Dr. Jérôme Le Coz (France) and Dr. Andersson Jafet (Sweden). All these experiences were made possible thanks to the financial support of the SYSTA grant.
