

## Report of attendance at the XIth Scientific Assembly of the International Association of Hydrological Sciences (IAHS 2022) from 29 May to 3 June 2022 in Montpellier (France)

Some 30 young researchers from more than 20 countries have been supported by SYSTA (Sivapalan Young Scientists Travel Award) to attend the conference.

To facilitate networking, a WhatsApp forum was created to allow exchanges before, during and after the conference. Staying in the same hotel also helped to strengthen ties.

On Monday 30 May 2022, during a dinner, the winners received the SYSTA Award certificate.

Receipt of the SYSTA award certificate from Prof. Murugesu SIVAPALAN

During the conference, I attended 4 workshops and several scientific presentation sessions. These courses are very useful for me to start my career as a young researcher

Attending the conference allowed me to present some of my research results and receive amendments, but most importantly to meet several researchers in my field from all continents. Beyond the conference, the networking continues among us young SYSTA awardees.

Abstract: [Comparison of One-Site vs Multi-Sites calibration/validation schemes for hydrological modelling of nested watersheds in the West African Sahel. Yetchékpo Patrick Gbohoui et al.](#)

Sessions: S22 [Tropical Hydrology](#)

Dr. Yetchékpo Patrick GBOHOU
