

## **Report of meeting attendance at IAHS2022 SA supported by SYSTA. Hamza Jerbi**

I would like to thank the SYSTA committee for the travel award and for giving me this opportunity to represent my work. My trip was very well organized and I was well received whether at the hotel or at the conference. I thank the SYSTA committee for taking into consideration for responding to all my requests with pleasure. The conference permitted me to promote my work on socio-hydrology and contribute to the discussion on the results of the Panta Rhei decade. Several points of major interest were raised on the co-evolution of water and human around the Wadi Merguellil in Central Tunisia which allowed to enrich the discussion and to cross my socio-hydrological findings in Tunisia and those in other regions. The assembly was also an exceptional opportunity to meet high quality scientists and to exchange knowledge and progress in socio-hydrology.

Abstract: [A socio-hydrological journey around the Wadi Merguellil in central Tunisia](#)

Hamza Jerbi, Sylvain Massuel, Jeanne Riaux, Christian Leduc, and Jamila Tarhouni

Session: S7 [Grounded socio-hydrology](#)
