

Conference Report from IAHS 2022 by Parviz Normatov

I would like to express my sincere appreciation and gratitude to the IAHS for the comprehensive support and representation through the SYSTA grant program of my participation in a high - level scientific event in Montpellier.

For me and in my organization was presented with a good platform for presenting our scientific results to a wide range of specialists. Participation in the event gave me the opportunity to establish close ties with representatives from other scientific schools in many countries and opportunities for further cooperation and to get acquainted with advanced research methods in hydrology and meteorology.

Participation in the symposium gave me a significant incentive and a discharge to solve more extended problems

The conference was organized at a high level. Naturally, I have no complaints. Based on the materials of my presentation, an article has been prepared and sent for inclusion in the Proceedings of the International Association Of Hydrological Sciences.

Abstract [The impact of climate change on hydrology and glaciation of the Zeravshan, Vakhsh and Pyanj river basin](#)

Session S23 [Advances in snow and ice hydrology](#)
