

Meeting Attendance Report: IUGG 2023, Berlin, Germany

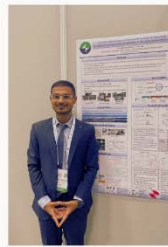

I attended the IUGG 2023 conference in Berlin, Germany. The event was impeccably organized at the City Cube Berlin, providing a forum for thought-provoking scientific interactions. Notably, the IAHS sessions presented enlightening keynotes, with Dr. Theresa Blume's discourse on experimental hydrology standing out as a personal favorite.

The SYSTA travel grant had its perks, accommodating me at the exquisite Niu Flash Hotel, conveniently located amidst the scenic Charlottenburg area. The Early Career Scientists social event at the Technical University Berlin fostered amazing networking opportunities. Additionally, I attended the Panta Rhei Symposium at GFZ Potsdam, gaining valuable insights into hydrological research which was followed by a delectable barbeque dinner featuring local cuisines.

Beyond the conference, Berlin's vibrant culture and spirit of freedom were captivating. The IAHS Gala Dinner held at a traditional Brauhaus provided a fitting conclusion. This visit undoubtedly marks one of the most memorable times in my life.
