

CONTENTS

| | | |
|------------------|---|-----------|
| Foreword | | xi |
| Preface | | xv |
| Acknowledgements | | xvii |
| Chapter 1 | Need for Hydrological Information | 1 |
| | The Water Balance | 1 |
| | Type of Water Resources Project | 1 |
| | Water supply and river flows | 2 |
| | Irrigation demand | 2 |
| | Hydroelectric power | 3 |
| | Sudan example | 3 |
| | Need for Consistent Records | 4 |
| | Rainfall | 4 |
| | Evaporation | 5 |
| | Further Data Requirements | 5 |
| | Conclusion | 5 |
| Chapter 2 | Network Design and Appraisal | 7 |
| | Sampling of Variations in Time and Space | 7 |
| | Type of variation | 7 |
| | Variations in time | 8 |
| | Variations in space | 8 |
| | Quality Appraisal | 9 |
| | Accuracy and precision | 9 |
| | Rating Curves | 10 |
| | Assessing rating curves | 11 |
| | Comparison of Rainfall and Runoff | 12 |
| | Use of Record Network in Time and Space | 12 |
| | Conclusion | 13 |
| Chapter 3 | Rainfall | 15 |
| | Rainfall Measurement | 16 |
| | Mean and variations | 17 |
| | Adjustment of short-term averages | 17 |
| | Case Studies of Spatial Variation | 18 |
| | Botswana | 18 |
| | New Zealand: storm direction | 19 |
| | Western Iran | 21 |
| | Northern Iran: use of vegetation evidence | 23 |

| | | |
|------------------|--|----|
| | Variation of Rainfall over Time | 25 |
| | Tana basin, Kenya | 25 |
| | Betwa basin, India | 26 |
| | Short-term rainfall | 27 |
| | Precision of Estimate of Basin Rainfall | 28 |
| | Use of Rainfall for Flood Forecasting and Prediction | 29 |
| | Flow forecasting | 29 |
| | Flood prediction | 30 |
| | Conclusion | 31 |
| Chapter 4 | Evaporation and Transpiration | 33 |
| | Measurement of Different Forms of Evaporation | 33 |
| | Estimation of Potential Transpiration | 34 |
| | Thornthwaite | 34 |
| | Penman | 34 |
| | Estimation of Actual Evaporation | 35 |
| | Climate examples: Sri Lanka, Botswana, India | 36 |
| | Measurement of Open Water Evaporation | 37 |
| | Botswana | 37 |
| | Estimation of Water Use by Vegetation | 39 |
| | Water use in Bahrain | 39 |
| | Abu Dhabi | 40 |
| | Measurement of Wetland Evaporation | 41 |
| | Direct measurement | 41 |
| | Indirect estimation | 41 |
| | Estimation of Net Rainfall | 42 |
| | Conclusion | 42 |
| Chapter 5 | Soil Moisture Storage | 43 |
| | Physical Characteristics of Soil Moisture Storage | 43 |
| | Soil Moisture Measurement | 44 |
| | Neutron probe | 44 |
| | Betwa study, central India | 45 |
| | Soil moisture network | 46 |
| | Application to Other Areas | 49 |
| | Relevance to irrigation requirements | 52 |
| | Use of Soil Moisture Deficit in Flood Studies | 52 |
| | Development of net rainfall index | 53 |
| | Conclusion | 54 |
| Chapter 6 | Groundwater Recharge | 55 |
| | Processes of Groundwater Recharge and Discharge | 55 |
| | Summary of Tehran Studies | 56 |
| | Initial study of the Tehran aquifer | 57 |
| | Estimates of recharge | 58 |
| | Flow through the aquifer | 59 |
| | Water table fluctuations | 62 |
| | Comparison of estimates | 63 |
| | Development of analogue model | 63 |

| | | |
|------------------|---|-----|
| | Development of dynamic model | 64 |
| | Example of joint exploitation of aquifer | 66 |
| | Variation of abstraction with time | 67 |
| | Water Resources of Bahrain | 67 |
| | Indirect Estimation of Groundwater Recharge | 70 |
| | Groundwater recharge in the Betwa basin | 71 |
| | Abu Dhabi and Oman | 71 |
| | Conclusion | 74 |
| Chapter 7 | River Flow | 75 |
| | Use of River Flow Records | 75 |
| | Basis of River Flow Measurement | 75 |
| | Types of river flow stations | 76 |
| | Areal sampling | 76 |
| | Quality of individual records | 77 |
| | Derivation of Rating Curves | 77 |
| | Examples of rating curves from the Nile basin | 79 |
| | Indirect Methods of Appraisal | 84 |
| | Importance of Quality Appraisal | 88 |
| | Examples of flow gauging appraisal | 88 |
| | Conclusion | 89 |
| Chapter 8 | Water Balance | 91 |
| | Types of Climate | 91 |
| | Humid Water Balance | 92 |
| | Sri Lanka | 92 |
| | Sarajevo region, Bosnia | 94 |
| | Other humid basins | 97 |
| | Arid Water Balance | 97 |
| | Northeast Botswana | 98 |
| | Pitman model | 101 |
| | Iran | 103 |
| | Yemen | 106 |
| | Monsoon Climate | 108 |
| | Betwa basin | 108 |
| | Conceptual model | 110 |
| | Ancient water resources development | 113 |
| | West Africa | 116 |
| | Summary | 117 |
| | Some Principles of Hydrological Modelling | 117 |
| | Simple conceptual models | 117 |
| | Ray at Grendon Underwood | 118 |
| | Water Balance of Lakes | 120 |
| | Lake Victoria | 121 |
| | Wetland Water Balance | 124 |
| | The Sudd | 125 |
| | African wetlands | 126 |
| | Conclusion | 128 |

| | | |
|-------------------|---|-----|
| Chapter 9 | Surface Water Resource Assessment | 129 |
| | Assessment of Mean Runoff | 129 |
| | Extension of River Flow Records | 130 |
| | Extension of river flows in the Senegal basin | 130 |
| | Extension of flows on Blue Nile tributaries | 133 |
| | Extension of River Flows Using Rainfall Records | 134 |
| | Kenya and New Zealand | 134 |
| | Extension of West African river flows | 136 |
| | Problem of Variability of African River Flows | 136 |
| | Other Examples of Climate Variability | 138 |
| | Analysis of Yield | 139 |
| | Run-of-river project | 139 |
| | Reservoir Yield | 140 |
| | Rainfall–runoff modelling in Botswana | 141 |
| | Other Methods of Reservoir Analysis | 142 |
| | Downstream Effect of Reservoirs | 144 |
| | Combined Reservoir Analysis | 145 |
| | Conclusion | 145 |
| | | |
| Chapter 10 | Flood Estimation | 147 |
| | Requirements for Flood Estimation | 147 |
| | Choice of Estimation Methods | 148 |
| | Statistical Distributions | 151 |
| | Flood Studies in Different Areas of the World | 153 |
| | Semiarid areas | 154 |
| | West Africa | 155 |
| | Other regions | 155 |
| | Software | 156 |
| | Polish floods | 156 |
| | Hydrological flood forecasting | 157 |
| | Use of Historical Information | 159 |
| | Britain | 159 |
| | China | 159 |
| | Indus | 161 |
| | Estimation of Design Flood | 162 |
| | Estimation of Maximum Flood | 162 |
| | Jordan | 163 |
| | Sri Lanka | 163 |
| | Conclusion | 166 |
| | | |
| Chapter 11 | Sedimentation and Environmental Issues | 167 |
| | Sediment Transport | 167 |
| | Tana basin, Kenya | 167 |
| | Bed load estimation | 169 |
| | Reservoir operation to minimize sedimentation | 170 |
| | Environmental Aspects | 171 |
| | Study of Jonglei Canal and Nile wetlands | 171 |
| | The physical background | 171 |
| | The water balance of the Sudd | 173 |

| | |
|---|------------|
| Hydrological control of vegetation | 174 |
| Impact of the Jonglei Canal | 177 |
| Mitigation of impact | 179 |
| Local effects of storage in Lake Albert | 181 |
| The Kagera flood plain | 181 |
| Control of Senegal flows to maintain flooding | 181 |
| Dead Sea Water Balance | 182 |
| Conclusion | 185 |
| Chapter 12 Postscript | 187 |
| References | 189 |
| Index | 197 |
