

Contents

PUB: Promise and Progress: Introduction <i>Murugesu Sivapalan, Thorsten Wagener, Stefan Uhlenbrook, Erwin Zehe, Venkat Lakshmi, Xu Liang, Yasuto Tachikawa & Praveen Kumar</i>	1
--	---

1 Model Improvements Through Detailed Process Studies <i>Stefan Uhlenbrook & Xu Liang</i>	5
---	---

Hydrological conceptual models of two Haute-Mentue subcatchments through environmental tracing and TDR soil moisture measurements <i>Daniela Balin, Christophe Joerin & André Musy</i>	7
--	---

Identification of flow pathways along hillslopes using electrical resistivity tomography (ERT) <i>Stefan Uhlenbrook & Jochen Wenninger</i>	15
--	----

Using factor analysis and end-member mixing techniques to infer sources of runoff generation <i>Corinna Abesser, Ruth Robinson & Chris Soulsby</i>	21
--	----

Process-based strategies for model structural improvement and reduction of model prediction uncertainty <i>Kellie B. Vaché & Jeffrey J. McDonnell</i>	30
---	----

Analysis of process controls on streamflow response in an Australian tropical catchment <i>Laura Montanari, Murugesu Sivapalan & Alberto Montanari</i>	38
--	----

Evaluation of a grid-based distributed hydrological model over a large area <i>Victor Koren, Fekadu Moreda, Seann Reed, Michael Smith & Ziya Zhang</i>	47
--	----

PAI-OFF: a new strategy for online flood forecasting in mountainous catchments <i>J. Cullmann, G. H. Schmitz & W. Görner</i>	57
--	----

2 Model Evaluation and Comparison: Uncertainty Analysis and Diagnostics <i>Thorsten Wagener</i>	69
---	----

Water resources estimation in less developed regions—issues of uncertainty associated with a lack of data <i>Denis A. Hughes</i>	72
--	----

Evaluating uncertainty in modelled sediment delivery in data-sparse environments: application to the Mae Chaem Catchment, Thailand <i>David A. Post & Michael G. Hartcher</i>	80
---	----

Bayesian kriging and GLUE applied to estimation of uncertainty due to precipitation representation in hydrological modelling <i>Luciano Nobrega Rodrigues Xavier, Afonso Augusto Araujo De Magalhaes & Otto Correa Rotunno Filho</i>	90
--	----

Evaluation of water quantity and quality modelling in ungauged European basins <i>Berit Arheimer</i>	99
--	----

Identification of a river water quality model and assessment of data information content <i>Michael Rode & Gunter Wriedt</i>	108
Influence of rating curve uncertainty on daily rainfall–runoff model predictions <i>Giuseppe T. Aronica, Angela Candela, Francesco Viola, & Marcella Cannarozzo</i>	116
Parameterization of frozen ground effects: sensitivity to soil properties <i>Victor Koren</i>	125
The Multi-Model approach to rainfall–runoff modelling <i>Adam M. Wyatt & Stewart W. Franks</i>	134
Hydrological model evaluation and comparison through uncertainty recognition and quantification <i>Shen Chiang, Yasuto Tachikawa & Kaoru Takara</i>	145
Evaluation of the Xinanjiang model structure by observed discharge and gauged soil moisture data in the HUBEX/GAME Project <i>Liliang Ren, Qiong Huang, Fei Yuan, Jixin Wang, Jing Xu, Zhongbo Yu & Xinren Liu</i>	153
Multi-objective conditioning of a SVAT model for heat and CO ₂ fluxes prediction <i>Xingguo Mo, Suxia Liu, Zhonghui Lin, Xiaomin Sun & Zhilin Zhu</i>	164
Uncertainty propagation in a sequential model for flood forecasting <i>Renata J. Romanowicz, Keith J. Beven & Peter C. Young</i>	177
<hr/>	
3 New Data Collection, Approaches and Model Development <i>Venkat Lakshmi</i>	185
<hr/>	
Role of spatial aggregation over runoff calculations on southeast France catchments <i>Nabil J. Eid, Flavie Cernesson, Nathalie Folton & Pascal Kosuth</i>	187
Influence of spatial variability of precipitation in a distributed rainfall–runoff model <i>Tapash Das, András Bárdossy & Erwin Zehe</i>	195
The frequency of precipitation days in the Yangtze River basin <i>Yijin Wu, Stefan Becker, Lorenz King, Hsiang-Te Kung, Tong Jiang, Heike Hartmann & Wenjing Zhu</i>	204
Estimating the potential evapotranspiration over the Yellow River basin by considering the land cover characteristics <i>M. C. Zhou, H. Ishidaira & K. Takeuchi</i>	214
Assimilation of remotely sensed soil saturation levels in conceptual rainfall–runoff models <i>Patrick Matgen, Jean-Baptiste Henry, Lucien Hoffmann & Laurent Pfister</i>	226
Investigation of the effect of a coupled land–atmosphere satellite data assimilation system on land–atmosphere processes <i>Souhail Boussetta, Toshio Koike, Mahadevan Pathmathevan & Kun Yang</i>	235

Hydrological modelling in Amazonia—use of the MGB-IPH model and alternative databases <i>Alfredo Ribeiro Neto, Walter Collischonn, Rui Carlos Vieira Da Silva & Carlos E. M. Tucci</i>	246
A new approach for the numerical modelling of the groundwater flow in the fractured rock massifs <i>Jiří Maryška, Otto Severýn, Miloslav Tauchman & David Tondr</i>	255
PUB and water resources management practises in Nigeria <i>Olusegun Adeaga, Lekan Oyebande & Idowu Balogun</i>	267
Frequency-domain analyses of GPR waveforms: enhancing near-surface observational capabilities <i>Guy Serbin & Dani Or</i>	274
Water level change in wells—a predictor for earthquakes? <i>Joseph Guttman, Akiva Flexer & Annat Yellin-Dror</i>	286
<hr/>	
4 New Modelling Approaches and Methods for Testing Models against Observations <i>Erwin Zehe & Yasuto Tachikawa</i>	291
<hr/>	
Physically-based model of heat and water transfer in frozen soil and its parameterization by basic soil data <i>Alexander Gelfan</i>	293
Effect of soil shrinkage on runoff generation in micro and mesoscale catchments <i>Falk Lindenmaier, Erwin Zehe, Martin Helms, Oleg Evdakov & Jürgen Ihringer</i>	305
Modelling flood plain vegetation based on long-term simulations of daily river–groundwater dynamics <i>Bruno Büchele, Peter Burek, Ralf Baufeld & Ilona Leyer</i>	318
Indirect assessment of flooding duration as a driving factor of plant diversity in wet grasslands <i>Cyrille Violle, Christophe Cudennec, Manuel Plantegenest, Christian Damgaard, Didier Le Coeur, Jan-Bernard Bouzille & Anne Bonis</i>	334
Effects of conservation tillage on storm flow: a model-based assessment for a mesoscale watershed in Germany <i>Ingo Haag, Annette Luce & Kai Gerlinger</i>	342
Assessing the predictive ability of the spatially distributed conceptual AFFDEF model for a mesoscale catchment <i>Tapash Das, Greta Moretti, Andrés Bárdossy & Alberto Montanari</i>	351
Large basin simulation experience in South America <i>Daniel Gustavo Allasia, Benedito Cláudio da Silva, Walter Collischonn & Carlos Eduardo Morelli Tucci</i>	360
Distributed rainfall–runoff analysis in a flow regulated basin having multiple multi-purpose dams <i>Takahiro Sayama, Yasuto Tachikawa, Kaoru Takara & Yutaka Ichikawa</i>	371
Surface runoff simulation for part of Yewa basin <i>Olusegun Adeaga, Lekan Oyebande & Christian Depraetere</i>	382

Inversion d'une modélisation de type hydrogramme unitaire à base géomorphologique: interprétation physique et première mise en œuvre <i>Houda Boudhraa, Christophe Cudennec, Mohamed Slimani & Herve Andrieu</i>	391
Numerical modelling of water transfer among precipitation, surface water, soil moisture and groundwater <i>Xi Chen, Zhicai Zhang & Yongqin David Chen</i>	400
Disaggregation of upslope catchment area and steepest slope for transferring geomorphometric information across scales <i>Nawa R. Pradhan, Yasuto Tachikawa & Kaoru Takara</i>	414
A multi-level and multi-scale structure of river network geomorphometry with potential implications towards basin hydrology <i>Christophe Cudennec, Jean-Christophe Pouget, Houda Boudhraa, Mohamed Slimani & Slah Nasri</i>	422
Application of the wavelet transform for analysis of precipitation and runoff time series <i>Celso Augusto G. Santos & Sandra Maria Araújo Ideiã</i>	431
<hr/>	
5 Progress in PUB Implementation (PUB Working Groups) <i>Murugesu Sivapalan</i>	441
<hr/>	
The PUB Top-Down Modelling Working Group (TDWG): initial development and activities <i>Ian G. Littlewood, Barry F. W. Croke & David A. Post</i>	443
Towards an uncertainty framework for predictions in ungauged basins: The Uncertainty Working Group <i>Thorsten Wagener, Jim Freer, Erwin Zehe, Keith Beven, Hoshin V. Gupta & Andras Bardossy</i>	454
MEDCLUB—starting line and first activities <i>Mauro Fiorentino, Domenico Carriero, Vito Iacobellis, Salvatore Manfreda & Ivan Portoghese</i>	463
Groundwater pollution and risks for the coastal environment (southeastern Italy) <i>Maurizio Polemio & Pier Paolo Limoni</i>	477
Canadian PUB planning and implementation <i>Christopher Spence, John W. Pomeroy & Alain Pietroniro</i>	487
Research initiatives in Thailand on Predictions in Ungauged Basins <i>Dushmanta Dutta, Chavalit Chaleeraktragoon & Saisunee Budhakoontharoen</i>	492
PUB Working Group on Orographic Precipitation, Surface Water and Groundwater Interactions, and their Impacts on Water Resources <i>Xu Liang, L. Ruby Leung, Maoyi Huang, Yun Qian, Mark S. Wigmosta, George B. Matanga & Dave Matthews</i>	505
