

## Contents

<b>Preface</b>	v
<i>by Dirk de Boer, Wojciech Froehlich, Takahisa Mizuyama &amp; Alain Pietroniro</i>	
<b>1 Field-based Studies—Current Conditions</b>	
Use of reconnaissance measurements to establish catchment sediment budgets: a Zambian example	3
<i>D. E. Walling, A. L. Collins, H. M. Sickingabula &amp; G. J. L. Leeks</i>	
Erosion prediction in ungauged glacierized basins	13
<i>Jim Bogen &amp; Truls E. Bønsnes</i>	
Soil erosion in the republic of moldova—the importance of institutional arrangements	24
<i>Wolfgang Summer &amp; Wolfgang Diernhofer</i>	
<b>2 Field-based Studies—Historical Perspectives</b>	
Identification of sources of sediment to Lake Samsonvale (North Pine Dam), southeast Queensland, Australia	33
<i>Grant Douglas, Phillip Ford, Gary Jones &amp; Mark Palmer</i>	
Chronology of alluvial sediment using the date of production of buried refuse: a case study in an ungauged river in central Japan	43
<i>Yoshimasa Kurashige, Hajime Kibayashi &amp; Goro Nakajima</i>	
Sediment yield estimation and check dams in a semiarid area (Sierra de Gádor, southern Spain)	51
<i>Wenceslao Martín-Rosales, Antonio Pulido-Bosch, Juan Gisbert &amp; Angela Vallejos</i>	
Reconstructing upland sediment budgets in ungauged catchments from reservoir sedimentation and rainfall records calibrated using short-term streamflow monitoring	59
<i>Victoria Holliday, David Higgitt, Jeff Warburton &amp; Sue White</i>	
Estimation of erosion and sediment outflow in the recent past	68
<i>Takahisa Mizuyama, Akitsu Kimoto, Yuji Yasuda, Yasuo Tomomatsu, Masaru Touhei &amp; Masaharu Fujita</i>	

### 3 Empirical and Physically-based Models

Mathematical model for predicting soil erosion by flowing water in ungauged watersheds 79  
*U. C. Sharma & Vikas Sharma*

Method for estimation of the delivery of sediments and solutes from Greenland to the ocean 84  
*Bent Hasholt*

A distributed model for estimating erosion and deposition of sediment in the Yellow River basin 93  
*Z. X. Xu, K. Takeuchi, H. Ishidaira & C. M. Liu*

Physically-based mathematical formulation for hillslope scale prediction of erosion in ungauged basins 101  
*Hafzullah Aksoy, M. Levent Kavvas & Jaeyoung Yoon*

Evaluation of an erosion simulation model in a semiarid region of Brazil 109  
*Vajapeyam S. Srinivasan, Ricardo de Aragão, Koichi Suzuki & Masahiro Watanabe*

Application of a process-based model as a predictive tool for erosion loss in ungauged basins 117  
*Celso Augusto Guimarães Santos, Vajapeyam S. Srinivasan & Carlos de Oliveira Galvão*

Application of the Agricultural Non-Point Source Pollution (AGNPS) model for sediment yield and nutrient loss prediction in the Dumpul sub-watershed, Central Java, Indonesia 125  
*Sutopo Purwo Nugroho*

Reliability evaluation of rainfall–sediment–runoff models 131  
*Takahiro Sayama, Kaoru Takara & Yasuto Tachikawa*

### 4 Integrating Models, GIS, and Remote Sensing

Hydrological modelling of imperfectly gauged basins: a new challenge 145  
*Xia Jun, Tan Ge, Li Xin & Zhu Yizhong*

Calibrating the SEDD model for Sicilian ungauged basins 151  
*Vito Ferro, Costanza Di Stefano, Mario Minacapilli & Mario Santoro*

Effects of land-use change on runoff response in the ungauged Ta-Chou basin, Taiwan <i>Pao-Shan Yu, Yu-Chi Wang &amp; Chun-Chao Kuo</i>	162
Development of an interactive embeddable Geographic Information System (E-GIS) for soil erosion prediction <i>Ahmad Munir &amp; Muh. Nurdin Abdullah</i>	171
Land-use based GIS-modelling for sedimentation reduction at Bili-Bili Dam, Indonesia <i>Muh. Nurdin Abdullah, Ahmad Munir &amp; Syamsul Arifin Lyas</i>	180
Assessment of gully erosion process dynamics for water resources management in a semiarid catchment of Swaziland (Southern Africa) <i>Michael Märker &amp; Aleksey Sidorchuk</i>	188
Predicting road erosion rates in selectively logged tropical rain forests <i>Ian Douglas</i>	199
Construction of sediment budgets in large scale drainage basins: the case of the upper Indus River <i>Khawaja Faran Ali &amp; Dirk H. De Boer</i>	206
First-order analysis of overland flow buffering in an ungauged fragmented upland basin <i>Alan D. Ziegler &amp; Thomas W. Giambelluca</i>	216
Applicability of the Gavrilović method in erosion calculation using spatial data manipulation techniques <i>Lidija Globevnik, Danko Holjević, Gregor Petkovšek &amp; Josip Rubinić</i>	224
Quantitative estimation of degradation in the Aliakmon River basin using GIS <i>Dimitrios A. Emmanouloudis, Odysseas P. Christou &amp; Evangelos I. Filippidis</i>	234
Spaceborne radar interferometry: a promising tool for hydrological analysis in mountain alluvial fan environments <i>F. Catani, P. Farina, S. Moretti &amp; G. Nico</i>	241
Key word index	249
