

# Volume 383, 2020 | Hydrological processes and water security in a changing world

Hydrological Processes and Water Security in a Changing World, Beijing, China, 6–9 November 2018

Editor(s): Z. Yu, C. Lu, D. Yu, J. Cai, G. Mahe, A. Mishra, C. Cudennec, H. A. J. Van Lanen, D. Orange, and A. Amani

## Foreword

Shamila Nair-Bedouelle

Proc. IAHS, 383, 1–1, <https://doi.org/10.5194/piahs-383-1-2020>, 2020

## Preface: Hydrological processes and water security in a changing world

Zhongbo Yu, Chunhui Lu, Jianyuan Cai, Dazheng Yu, Gil Mahe, Anil Mishra, Christophe Cudennec, Henny A. J. Van Lanen, Didier Orange, and Abou Amani

Proc. IAHS, 383, 3–4, <https://doi.org/10.5194/piahs-383-3-2020>, 2020

## Precipitation and climate impact

### Variations of Seasonal Precipitation in the Yellow River Basin and Its Relationship to General Circulation and SST

Jing Liu, Lijun Jin, Changxing Huang, and Lina Zhang

Proc. IAHS, 383, 5–12, <https://doi.org/10.5194/piahs-383-5-2020>, 2020

### Precipitation and water stage variability under rapid developments of urbanization in Taihu Basin

Juan Wu, Hejuan Lin, Zhiyong Wu, Song Jin, Jian Wu, Haiping Ji, Min Liu, and Yueyun Gan

Proc. IAHS, 383, 13–24, <https://doi.org/10.5194/piahs-383-13-2020>, 2020

### Analysis of water level variations in the Huangzhuang reach (Hanjiang River, China) during recent years

Xiao Xiao, Beiping Mao, and Bao Qian

Proc. IAHS, 383, 25–30, <https://doi.org/10.5194/piahs-383-25-2020>, 2020

### Climate change impact on hydrological characteristics and water availability of the Mountain Pamir Rivers

Inom Normatov and Parviz Normatov

Proc. IAHS, 383, 31–41, <https://doi.org/10.5194/piahs-383-31-2020>, 2020

### Stress testing as complement to climate scenarios: recharge scenarios to quantify streamflow drought sensitivity

Michael Stoelzle, Maria Staudinger, Kerstin Stahl, and Markus Weiler

Proc. IAHS, 383, 43–50, <https://doi.org/10.5194/piahs-383-43-2020>, 2020

### Changing climate and implications for water use in the Hetao Basin, Yellow River, China

Ian White, Tingbao Xu, Jicai Zeng, Jian Yu, Xin Ma, Jinzhong Yang, Zailin Huo, and Hang Chen

Proc. IAHS, 383, 51–59, <https://doi.org/10.5194/piahs-383-51-2020>, 2020

### Study of the spatial and temporal variability of rainfall in the Middle and Lower Cheliff (Algeria)

Ali Hadour, Gil Mahé, and Mohamed Meddi

Proc. IAHS, 383, 61–68, <https://doi.org/10.5194/piahs-383-61-2020>, 2020

### Extreme Rainfall and Temperature Changes Assessment on late-twenty-first-century over the Mono River Basin, Togo (West-Africa)

Batablinlè Lamboni, Agnidé Emmanuel Lawin, Celestin Manirakiza, and Dagbégnon Luc Olabodé

Proc. IAHS, 383, 69–78, <https://doi.org/10.5194/piahs-383-69-2020>, 2020

### Hydroclimatic variability in Tomi at Sibut, Gribingui at Kaga-Bandoro and Fafa at Bouca basins, in the Central African Republic

Cyriaque Rufin Nguimalet and Didier Orange

Proc. IAHS, 383, 79–84, <https://doi.org/10.5194/piahs-383-79-2020>, 2020

## Observation, analysis and simulations of hydrologic processes

### The Runoff Observation and Composition Analysis in the Niyang River Basin on the Tibetan Plateau

Hongwei Liu, Jiufu Liu, Wenzhong Wang, Xing Min, Hao Zheng, Xiyuan Deng, and Niu Wang

Proc. IAHS, 383, 85–91, <https://doi.org/10.5194/piahs-383-85-2020>, 2020

### Study on Hydrologic Forecasting at the Construction Period of Datengxia Hydroproject

Kangming Lu

Proc. IAHS, 383, 93–97, <https://doi.org/10.5194/piahs-383-93-2020>, 2020

### Analysis of Event-based Hydrological Processes at the Hydrohill Catchment Using Hydrochemical and Isotopic Methods

Na Yang, Jianyun Zhang, Jiufu Liu, Guodong Liu, Aimin Liao, and Guoqing Wang

Proc. IAHS, 383, 99–110, <https://doi.org/10.5194/piahs-383-99-2020>, 2020

### **Analysis of the influence of environmental change on river runoff in Loess Plateau of China**

Yong Jing and Zuhao Zhou

Proc. IAHS, 383, 111–119, <https://doi.org/10.5194/piahs-383-111-2020>, 2020

### **The New Situation of Diatom Bloom in the Middle and Lower Reaches of Hanjiang River under River Chief System**

Bao Qian, Xiao Xiao, Hefan Wang, and Jincheng Wang

Proc. IAHS, 383, 121–127, <https://doi.org/10.5194/piahs-383-121-2020>, 2020

### **Geomorphometry-based modelling of discharge series in ungauged basins – Robustness regarding DEM sources**

Stéphane Ecrepont and Christophe Cudennec

Proc. IAHS, 383, 129–134, <https://doi.org/10.5194/piahs-383-129-2020>, 2020

### **Long-term persistence in discharge time series of mountainous catchments in the Elbe River basin**

Ondrej Ledvinka and Thomas Recknagel

Proc. IAHS, 383, 135–140, <https://doi.org/10.5194/piahs-383-135-2020>, 2020

### **Understanding and predicting large-scale hydrological variability in a changing environment**

Nicolas Massei, Daniel G. Kingston, David M. Hannah, Jean-Philippe Vidal, Bastien Dieppois, Manuel Fossa, Andreas Hartmann, David A. Lavers, and Benoit Laignel

Proc. IAHS, 383, 141–149, <https://doi.org/10.5194/piahs-383-141-2020>, 2020

### **Modeling hydrologic processes and potential responses to climate change in an agro-silvo-pastoral watershed in the Mediterranean area**

Youssef Brouziyne, Lahcen Benaabidate, Aziz Abouabdillah, Rachid Bouabid, and Abdelghani Chehbouni

Proc. IAHS, 383, 151–158, <https://doi.org/10.5194/piahs-383-151-2020>, 2020

### **Study of soil erosion risks using RUSLE Model and remote sensing: case of the Bouregreg watershed (Morocco)**

Fatima Hara, Mohammed Achab, Anas Emran, and Gil Mahe

Proc. IAHS, 383, 159–162, <https://doi.org/10.5194/piahs-383-159-2020>, 2020

### **Calibration of the hydrological model GR4J from potential evapotranspiration estimates by the Penman-Monteith and Oudin methods in the Ouémé watershed (West Africa)**

Domihlo Japhet Kodja, Arsène J. Sègla Akognongbé, Ernest Amoussou, Gil Mahé, E. Wilfrid Vissin, Jean-Emmanuel Paturel, and Constant Houndénou

Proc. IAHS, 383, 163–169, <https://doi.org/10.5194/piahs-383-163-2020>, 2020

### **Hydropluviometric variability in non-Sahelian West Africa: case of the Koliba/Corubal River Basin (Guinea and Guinea-Bissau)**

Saly Sambou, Honore Dacosta, Rene Ndimag Diouf, Ibrahima Diouf, and Alioune Kane

Proc. IAHS, 383, 171–183, <https://doi.org/10.5194/piahs-383-171-2020>, 2020

### **Floods in the changing environments**

16 Sep 2020

#### **Urban flood modelling in Qiqihar city based on MIKE flood**

Jiahong Liu, Zejin Li, Weiwei Shao, Dianyi Yan, and Chao Mei

Proc. IAHS, 383, 185–192, <https://doi.org/10.5194/piahs-383-185-2020>, 2020

#### **Evolution of Urban Flooding in China**

Dianyi Yan, Jiahong Liu, Weiwei Shao, and Chao Mei

Proc. IAHS, 383, 193–199, <https://doi.org/10.5194/piahs-383-193-2020>, 2020

### **Analysis of the specific water level of flood control and the threshold value of rainfall warning for small and medium rivers**

Yuzhong Hu, Zhaoxia Wang, Bin Zhou, and Shiqi Jiang

Proc. IAHS, 383, 201–211, <https://doi.org/10.5194/piahs-383-201-2020>, 2020

### **Ensemble flood simulation for the typical catchment in humid climatic zone by using multiple hydrological models**

Jie Wang, Jianyun Zhang, Guoqing Wang, Xiaomeng Song, Xiaoying Yang, and Yueyang Wang

Proc. IAHS, 383, 213–222, <https://doi.org/10.5194/piahs-383-213-2020>, 2020

### **Operational flood forecasting and warning under the changing environment in China**

Zhiyu Liu

Proc. IAHS, 383, 223–228, <https://doi.org/10.5194/piahs-383-223-2020>, 2020

### **Extreme hydrological phenomena in the forest steppe and steppe zones of Ukraine under the climate change**

Valeriya Ovcharuk, Eugene Gopchenko, Nataliya Kichuk, Zhannetta Shakirzanova, Liliia Kushchenko, and Mariia Myroschnichenko

Proc. IAHS, 383, 229–235, <https://doi.org/10.5194/piahs-383-229-2020>, 2020

### **Rainfall measurement from mobile telecommunication network and potential benefit for urban hydrology in Africa: a simulation framework for uncertainty propagation analysis**

Maxime Turko, Marielle Gosset, Christophe Bouvier, Nanee Chahinian, Matias Alcoba, Modeste Kacou, and Apoline Yappi

Proc. IAHS, 383, 237–240, <https://doi.org/10.5194/piahs-383-237-2020>, 2020

### **Estimating extreme dry spell risk in Ichkeul Lake Basin (Northern Tunisia): a comparative analysis of annual maxima series with a Gumbel distribution**

Majid Mathlouthi and Fethi Lebdi

Proc. IAHS, 383, 241–248, <https://doi.org/10.5194/piahs-383-241-2020>, 2020

### **Urban flood vulnerability mapping of part of the Lagos metropolis**

Olusegun Adeaga, Olufemi Taiwo Oyeneye, and Olutosin Akinbaloye

Proc. IAHS, 383, 249–254, <https://doi.org/10.5194/piahs-383-249-2020>, 2020

### **Improved understanding of the Senegal floodplain socio-hydrosystems with multi-scalar earth observations**

Andrew Ogilvie, Jean-Christophe Poussin, Jean-Claude Bader, Didier Martin, Gora Ndiaye, and Djiby Dia

Proc. IAHS, 383, 255–260, <https://doi.org/10.5194/piahs-383-255-2020>, 2020

### **Drought monitoring and analysis**

#### **A review of the adaptability of hydrological models for drought forecasting**

Zikang Xing, Miaomiao Ma, Zhicheng Su, Juan Lv, Peng Yi, and Wenlong Song

Proc. IAHS, 383, 261–266, <https://doi.org/10.5194/piahs-383-261-2020>, 2020

#### **Linking drought indices to impacts in the Liaoning Province of China**

Miaomiao Ma, Juan Lv, Zhicheng Su, Jamie Hannaford, Hongquan Sun, Yanping Qu, Zikang Xing, Lucy Barker, and Yaxu Wang

Proc. IAHS, 383, 267–272, <https://doi.org/10.5194/piahs-383-267-2020>, 2020

#### **Drought monitoring and early warning in China: a review of research to pave the way for operational systems**

Lucy J. Barker, Jamie Hannaford, and Miaomiao Ma

Proc. IAHS, 383, 273–279, <https://doi.org/10.5194/piahs-383-273-2020>, 2020

#### **Hydrological Drought Characteristics Based on Groundwater and Runoff Across Europe**

Samuel Jonson Sutanto and Henny A. J. Van Lanen

Proc. IAHS, 383, 281–290, <https://doi.org/10.5194/piahs-383-281-2020>, 2020

#### **The challenges of hydrological drought definition, quantification and communication: an interdisciplinary perspective**

Kerstin Stahl, Jean-Philippe Vidal, Jamie Hannaford, Erik Tjeldeman, Gregor Laaha, Tobias Gauster, and Lena M. Tallaksen

Proc. IAHS, 383, 291–295, <https://doi.org/10.5194/piahs-383-291-2020>, 2020

#### **The Groundwater Drought Initiative (GDI): Analysing and understanding groundwater drought across Europe**

Bentje Brauns, Daniela Cuba, John P. Bloomfield, David M. Hannah, Christopher Jackson, Ben P. Marchant, Benedikt Heudorfer, Anne F. Van Loon, H el ene Bessiere, Bo Thunholm, and Gerhard Schubert

Proc. IAHS, 383, 297–305, <https://doi.org/10.5194/piahs-383-297-2020>, 2020

#### **Trends in national and regional scale drought in New Zealand**

Daniel G. Kingston and Eleanor J. Treadwell

Proc. IAHS, 383, 307–314, <https://doi.org/10.5194/piahs-383-307-2020>, 2020

#### **Past and future drought in Northwestern Algeria: the Beni Bahdel Dam catchment**

Senna Bouabdelli, Ayoub Zeroual, Mohamed Meddi, Fateh Djelloul, and Ramdane Alkama

Proc. IAHS, 383, 315–318, <https://doi.org/10.5194/piahs-383-315-2020>, 2020

#### **Extreme flow variability analysis at the Bianouan hydrometric station on the Bia River watershed in C te d'Ivoire**

Kan Martin Kouassi, Koffi Blaise Yao, Kouakou Lazare Kouassi, Jean Biemi, and Nagnin Soro

Proc. IAHS, 383, 319–325, <https://doi.org/10.5194/piahs-383-319-2020>, 2020

## **Water resources and eco-environmental impacts**

### **Water replenishment for ecological flow with E-WAS framework: a case study of the Longgang River Basin, Shenzhen, China**

Ziqi Yan, Zuhao Zhou, Xuefeng Sang, Hao Wang, and Yangwen Jia

Proc. IAHS, 383, 327–339, <https://doi.org/10.5194/piahs-383-327-2020>, 2020

### **Impacts of dam construction on river channel evolution: a case of Minjiang River in Southeastern China**

Ying Yao, Wei Cui, Wen Wang, Fu-Min Ma, and Ben-Yue Chen

Proc. IAHS, 383, 341–346, <https://doi.org/10.5194/piahs-383-341-2020>, 2020

### **Optimization of water quality evaluation method in Three Gorges Reservoir area under different hydrological conditions**

Jing Yuan, Jin-cheng Wang, and Bao Qian

Proc. IAHS, 383, 347–353, <https://doi.org/10.5194/piahs-383-347-2020>, 2020

### **Climate change impact on water resources in Klong Yai River Basin, Thailand**

Chaiwat Ekkawatpanit, Weerayuth Pratoomchai, Chatchapol Khemngoen, and Patchanok Srivihok

Proc. IAHS, 383, 355–365, <https://doi.org/10.5194/piahs-383-355-2020>, 2020

### **Impact of hydropower dam on total suspended sediment and total organic nitrogen fluxes of the Red River (Vietnam)**

Nhu Da Le, Thi Phuong Quynh Le, Thi Xuan Binh Phung, Thi Thuy Duong, and Orange Didier

Proc. IAHS, 383, 367–374, <https://doi.org/10.5194/piahs-383-367-2020>, 2020

### **A new approach to aquatic ecosystem monitoring of the Ob river**

Aleksandr Andreevich Tskhai, Aleksandr Vasilievich Puzanov, Nelly Mikhailovna Kovalevskaya, and Vladimir Viktorovich Kirillov

Proc. IAHS, 383, 375–379, <https://doi.org/10.5194/piahs-383-375-2020>, 2020

### **PREMHYCE: An operational tool for low-flow forecasting**

Pierre Nicolle, François Besson, Olivier Delaigue, Pierre Etchevers, Didier François, Matthieu Le Lay, Charles Perrin, Fabienne Rousset, Dominique Thiéry, François Tilmant, Claire Magand, Timothée Leurent, and Élise Jacob

Proc. IAHS, 383, 381–389, <https://doi.org/10.5194/piahs-383-381-2020>, 2020

### **Climatic variability in the Sine-Saloum basin and its impacts on water resources: case of the Sob and Dohine watersheds in the region of Niakhar**

Waly Faye, Awa Niang Fall, Didier Orange, Frédéric Do, Olivier Roupsard, and Alioune Kane

Proc. IAHS, 383, 391–399, <https://doi.org/10.5194/piahs-383-391-2020>, 2020
